

# Geuder Glass Cannula for DMEK

## Brilliantly Simple

CorneaGen presents the Geuder Glass Cannula for Descemet's Membrane Endothelial Keratoplasty (DMEK) procedures.

- Smooth
- Gentle
- Atraumatic

### EASY TO LOAD

Large rounded opening of cannula allows for simple and easy loading of the graft

### 2.5 MM INCISION

Small incision size allows for gentle and controlled injection into the anterior chamber

BRILLIANTLY SIMPLE

## CorneaGen Can Ease Your Transition to DMEK

Descemet's Membrane Endothelial Keratoplasty (DMEK) is one of the newest surgical techniques in corneal transplantation that may provide patients with quicker recovery times along with better visual acuity. We provide surgeons with access to pre-stripped tissue for this advanced procedure.

### RESEARCH TISSUE FOR DMEK PRACTICE

Many surgeons consider practice tissue to be a critical first step in getting started with DMEK. We offer research whole globes and DMEK pre-stripped grafts for surgeons interested in providing DMEK grafts to their patients.

### BACK-UP DSAEK SERVICE

By request, CorneaGen can provide backup DSAEK tissue for your first case. If it isn't used, simply contact us immediately so it can be returned at no charge. The backup tissue will fall in a range of your normal DSAEK specifications.
