

Tissue Services

The most comprehensive portfolio of corneal transplant tissue

We are committed to helping transform how you treat and care for every patient impacted by corneal disease.

- ✓ Complete Donor Tissue Customization
- ✓ Best-in-Class Surgical Support
- ✓ Innovative Pre-Loaded Products

Complete Donor Tissue Customization

Precision-Cut Corneal Tissue to Your Specification

CorneaGen offers the most comprehensive portfolio of tissue processed with industry-leading accuracy, compliant with both FDA Regulations and EBAA Medical Standards.

Customize your request to your preference. Specify a wide range of options including DSEK tissue thickness, markings, pre-loaded, and Ampho B.

Pre-Loaded DMEK & DSEK Tissue

At the forefront of exclusive pre-loaded tissue. Offering the Geuder Pre-Loaded Glass Cannula for DMEK and the EndoSerter-PL for DSEK.

Ampho B Additive

Championing Amphotericin B use since 2018. Ampho B is available with most tissue types, including all pre-cut and pre-loaded tissue.

Innovative Pre-Loaded Products

Geuder Pre-Loaded Glass Cannula for DMEK

Specifically designed for DMEK, our pre-loaded cannula comes ready-to-insert. The consistent 2.4 mm incision size allows for gentle and controlled injection into the anterior chamber. Pre-loaded saves time in the O.R.

EndoSerter®-PL

The EndoSerter®-PL is an FDA approved, single-use graft insertion device, pre-loaded with expertly processed Nano-Thin™ or Ultra-Thin DSEK tissue.

- Designed to allow consistent allograft positioning
- Simplifies the procedure, maximizing O.R. efficiency
- Reduces endothelium manipulation in the O.R
