

Non-Sterile Sclera

CorneaGen offers surgeons whole or quarter non-sterile sclera.

Applications for Non-Sterile Sclera

- ✓ Glaucoma surgery as a patch graft for tube shunt coverage
- ✓ Scleral reinforcement or repair for scleral melts, thinning of perforations
- ✓ Oculoplastic surgery
- ✓ Treating corneal or scleral defects
- ✓ Globe repair after ocular trauma

PRACTICAL BENEFITS FOR TODAY'S SURGEONS

- **Trusted Preservation Approach:** Ethanol (95%) is an established agent used during preparation to help maintain a clean tissue environment.
- **Ready When You Are:** With a storage life of up to two years, alcohol preserved sclera offers dependable availability to support surgical planning.
- **Simple Pre Use Preparation:** A 20 to 40 minute rinse in balanced saline solution (BSS) is typically all that's needed to prepare the tissue for use.

Code	Description	Sterile?
200	Whole Sclera in 95% EtOH	No
202	Quarter Sclera in 95% EtOH	No
